ALCATEL-LUCENT OPENTOUCH CONVERSATION MOBILE APPLICATION FOR OMNIPCX OFFICE RCE USERS SMALL AND MEDIUM ENTERPRISES

More and more employees are becoming a flexible workforce by using the right device to suit their context, with the right services for maximum efficiency. Mobility is a key asset that allows users to remain closely connected to their company, ensuring business continuity. Alcatel-Lucent OpenTouch® Conversation mobile solutions for smartphones help users within SMBs increase their productivity significantly. With this advanced application, mobile employees gain the power of mobile unified communications – including telephony services and access to multiple communication modes – from a single, easy-to-use interface.

OpenTouch Conversation for Android

OVERVIEW

OpenTouch Conversation (OTCV) for OmniPCX® Office RCE is a mobile application connected to the Alcatel-Lucent OmniPCX Office RCE system. It delivers advanced unified communication services to Apple® iPhone™, Google Android® and Windows® Phone® mobile devices, including single identity, directory lookup, enterprise telephony and call routing control. The connection between the mobile device and the corporate infrastructure uses industry-standard encryption mechanisms to protect the data transmission.

FEATURES

- Single identity
 - One phone number across multiple devices (desk phone, mobile, personal computer, home phone and so forth)
 - Single business identity, whatever the device used
- Business caller identification
- Universal Directory lookup
- Search local and corporate contacts (OmniPCX Office directory and external LDAP database) from an easy-to-use interface
- Contacts
 - Get instant access to contacts and use a single click to call

- Notifications
 - Notification of new voice messages, new instant message and missed calls
- Business calling anywhere
 - Calling from the local contact list or corporate directory, favorite contacts list, business communication history, voicemail interface and more using any dial format, including enterprise dialing plan
- Mid-call control
 - Three party conference
 - Take a call, clear a call, transfer a call, hold/retrieve a call, switch between calls and so forth
- Unified business communication history
 - Filter events (All calls, missed calls, voice messages, instant messages)
- VoIP using SIP Companion option
 - OTCV for iPhone and Android integrate
 VoIP capabilities allowing the user to
 place and receive business calls on his
 iPhone, mobile through the company
 Wi-Fi[®] data connection (Voice Over
 Wi-Fi) and VPN. This feature takes
 advantage of VPN access and or Wi-Fi
 access point.
- Get Call Feature
 - Enable the user switching a conversation from his mobile to his business device without interrupting the call

- Visual voicemail
 - Display and manage voice messages with a visual voicemail interface (select, play back or delete messages in any order)
- Any way, anytime
 - Control which devices will ring (desk phone, mobile, personal computer, home phone, colleague or other), based on office and mobile profiles
- Unified Instant messaging
 - Instant Messaging between OmniPCX
 Office RCE users including unified access and instant notification from any users's devices, IM conversation view with history

BENEFITS

- Business and private lifestyle management
 - Business mode: Incoming and outgoing calls are processed by the Alcatel-Lucent communication server
 - Private mode only on OTCV for Android: Incoming and outgoing calls are processed by the mobile carrier (a private call can be performed either from the OTCV app or the native dialer)
- Data over Wi-Fi
 - Automatic switch to trusted WLAN (roaming)

- Secure access to the corporate infrastructure
 - HTTPS support (encrypted channel)
 - Virtual Private Network (VPN) support
- Application management
 - Software download over the air
 - Remote configuration and provisioning through Alcatel-Lucent client management functions

DENERITS	
Access features anywhere	 Users have unified communication capabilities everywhere, on-site and off-site. So, regardless of location, they can get business notification events (instant messages, voice messages and missed calls) and access to enterprise-grade services, including corporate directory, telephony and communication history.
Maintain a single identity	 A single business number is used across multiple devices, such as desk phone, personal computer, mobile phone and home phone. Outbound calls from a mobile device can use a single identity and phone number, making it easier for colleagues, customers, partners and personal contacts to recognize calls from the OTCV mobile applications.
Connect any way, anytime	 Workers can select the best way to communicate when initiating a phone call. VPN support for both data and VoIP.
Control/reduce costs	 Cellular: Significantly reduce smartphone costs with savings on long distance calls. WLAN: Use Wi-Fi for data when at the office or at home, for voice when inside of the company (iPhone and Android only). VoIP using SIP Companion option
Connect more securely	 Secure access is provided to the enterprise with HTTPS support (encrypted channel) and VPN support.
Coverage optimization	VoIP using SIP Companion option
Conversation continuity and time saving	Get Call Feature
